

Naticol® is a bioactive European marine collagen type I that supports rejuvenation of the body's own collagen, resulting in tighter, firmer, and smoother looking skin. It is produced from 100% fish skin & scales through a traceable and sustainable process, earning it Friend of the Sea® certification. It boasts exceptional organoleptic properties, rendering it suitable for a wide variety of applications. **Naticol®**'s unique enzymatic hydrolysis produces peptides of optimal molecular weight, enhancing its bioavailability. This allows the body to effectively circulate and absorb necessary amino acids used in collagen fibril synthesis and other connective tissues. **Naticol®** has been clinically studied to improve skin hydration, firmness, elasticity, and appearance of wrinkles with as little as 2.5g daily. Sustainably farmed, as well as wild-caught, available.

PRODUCT FACTS:

Advantages:

- Clinically studied
- European origin
- Sustainably produced
- Neutral taste & smell
- Water soluble with clear dispersion
- Wild-caught available
- Low clinical dose of 2.5g / day
- Reduces appearance of fine lines & wrinkles
- Supports skin firmness, hydration, and elasticity

Certifications:

- Non GMO
- Gluten free
- Kosher
- Halal
- GRAS

Applications:

- Tablets, capsules
- Powders
- Gummies
- Beverages
- Functional foods
