

BeautyOLIGO® is a unique GOS (Galacto-oligosaccharides) prebiotic proven to be effective in supporting healthy skin appearance. The gut is the body's first line of defense. An imbalanced gut microbiome can impact gut barrier function, allowing toxins to enter circulation and accumulate into the skin, causing oxidative stress, inflammation, discoloration, and breakdown of collagen and elastin. BeautyOLIGO® helps to optimize the gut environment by stimulating the growth of beneficial bacteria and hindering the growth of harmful bacteria. In turn, it helps strengthen the immune system, helps to eliminate toxins and inhibits the activation of collagen- and elastin-degrading enzymes. BeautyOLIGO®'s unique mechanism of action supports skin health via the gut-skin axis, enhancing collagen function in the skin and improving skin hydration and skin tone.

## PRODUCT FACTS:

### **Advantages:**

- Supports a healthy microbiome
- Unique mechanism of action supports skin health via the gut-skin axis
- Enhances collagen function in the skin
- Improves skin hydration
- Reduces appearance of fine lines and wrinkles
- Skin brightening effects
- Clinically-proven skin health benefits
- 2 g/day

### **Applications:**

- Beauty from within functional foods, beverages and supplements
- Smooth, pleasant taste
- Low water activity
- Gummies, tablets, capsules, powders, beverages

### **Certifications:**

- FDA GRAS
