

Low Glycemic GOS (Galactooligosaccharides)

AIDP's NeoGOS™ is a patented form of GOS (Galactooligosaccharides) that selectively stimulates the growth and activity of beneficial bacteria in the colon. Galactooligosaccharides are short chain dietary fibers that occur naturally in human milk. NeoGOS is developed by a unique process that yields a high-purity, low-glycemic GOS. Its unique properties benefit the gut flora by producing short-chain fatty acids, which has been shown to benefit immunity, energy and a healthy metabolism.

PRODUCT FACTS:

Advantages:

- Low glycemic form of GOS
- High purity
- Improves gut environment
- Enriches lactic acid bacteria and Bifidobacteria
- Increases beneficial bacteria and decreases harmful bacteria
- Supports a healthy immune system
- Pleasant tasting and palatable
- Low water activity
- Heat resistant

Applications:

- Gut health prebiotics
- Infant nutrition
- Children's prebiotics
- Gut health balance

Certification:

- Organic
